

Are there any routers that don't require fiber optic cables

Overview

There are two ways you can use a Wi-Fi router without cables: There are Wi-Fi routers that can be purchased with a network provider. Non Wi-Fi routers, also known as wired routers, are designed to provide wired network connections without the need for a wireless connection. This convenient design works well when: You can place it in the ideal spot within your home for optimal coverage—often at the center. The problem is. Is there a wifi router that I can buy that doesn't require a wire to be connected to a wall, one where I can just plug it into a wall socket in my room without any messy cables?

You could try using a “Ethernet over power adaptor” plug one into a PowerPoint near your modem and run an Ethernet cable. Looking for a good way to get online, without using broadband?
