

Assembly of overseas power distribution boxes

Overview

This article offers a practical, general installation workflow and ongoing maintenance guidance ideal for overseas projects. It focuses on universality. As a family-owned company operating worldwide, we guarantee the safe distribution of electrical energy in industry, commerce and infrastructure. With over 1,000 employees, 640 of them in Germany, 14 subsidiaries in Germany and abroad, we have been operating successfully in the market for over 90. HDT offers Power Distribution Units (PDUs) and Utility Distribution Boxes (UDBs) in various configurations. A Power Distribution Unit (PDU) allows two generators to be synchronized, and both are brought online to supply power to a common bus. The sequence ensures that the Earth connection is made first and disconnected last. Ultimately, cost, resiliency, and maintainability will drive the equipment selection. Many companies are adopting zero energized work policies.
