

Austrian Optical Cable Project Construction

Overview

Austrian operator A1 is investing EUR 15 million to build fiber optic connections for 5,500 households in Strasshof, Lower Austria, with EU funding. The project will provide speeds up to 1,000 Mbps and is set to be completed in two years. Fibre optic civil works in Switzerland and Austria present specific technical and regulatory challenges: different public procurement frameworks, geological conditions and country-specific standards require DACH trenching contractors to have in-depth expertise. Technical requirements across the. The launch of the new LAYJET technology in 2017 disrupted the world of fibre optic cable laying.
