

Backup Core Switch Configuration

Overview

In this tutorial, you will learn how to back up and restore Cisco switch/router configurations using an SCP server. SCP (SSH Copy Protocol) is a secure client-server-based network protocol for transferring files. Cisco recommends that you have knowledge of these topics and have the required access: Access to a Trivial File Transfer Protocol (TFTP) or File Transfer Protocol (FTP) server. It is. Please I would like to know the CLI command to 1. Oh, and to restore use the following: `copy tftp:// 192.1 /backupfilename startup-config`. Thanks sir But. These configurations dictate how your network operates—everything from VLAN assignments and port configurations to security settings and routing protocols are defined here. This contains manual copies of files used for protection against system shutdown or for the maintenance of a specific operating state.
