

## Cable Management Methods for Accessory Racks

Focus creates quality products

### Overview

Cable trays and raceways are essential tools for managing cables, especially in a server rack environment. While both serve your IT operations, these cables handle critical circuits that must stay up and running. Any mishandled switching installations provide higher and higher levels of performance and capacity. But with this growth of capability come a parallel growth of discrete data communications and power cabling. TIA/EIA-568A is for commercial buildings cabling, and specifies a generic cabling system that will support a multi-product, multi-vendor environment. ▼  
 What is the difference between a Patch Cable Organizer and Plastic Horizontal Cable Manager?

The main difference between using a Patch Cable Organizer and a Plastic Horizontal Cable Manager. Siemon's economical Value Rack System combines a durable 2-post rack with a vertical cable manager for securing equipment while making cable routing and organizing a breeze and saving time, labor and space. From adjustable-depth 4-post racks for mounting extended-depth equipment in the data center. p  
 your cables organized and protected.
