

## Cable tray bend and crossover

### Overview

Cable tray fittings like elbows, bends, tees, crosses, and risers are used to change the direction of cable routing. In a well-planned Cable Management system, cables often need to cross paths—but that doesn't mean they should tangle or interfere. No more chaotic wiring or compromised. Equal tees, unequal tees and crossovers are available for light, medium and heavy duty cable tray systems with widths ranging from 50mm – 900mm. Materials and finishes available are mild steel pre galvanised as standard with mild steel hot dip galvanised after manufacture and stainless steel grade. Cable trays - Fittings, cable trays, universal. Cable Tray Light, Medium, and Heavy. New deals daily! Hurry! Light Duty Accessories 12mm Return. Simply enter your email below to get the best deals.
