

Connecting a two-core fiber optic cable to a switch

Overview

Choose an SFP module based on the fiber optic cabling that will be connected to the network switches. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. more We. I am planning to connect core switch to multiple switches using 6 strand fiber cable. which type of cconnection is resilient Star or Ring?

?

?

If I make star then do i have to use new cable to each switch or strand of a cable to patch other switch?

?

Thanks. It usually depends on the model of the switches. I need to connect 4 Floor Building with 4 Cisco 2960 - 48 ports switch each other and it needs to be through a fiber.
