

Copper bolts on cable tray cover plates

Overview

The fittings can be fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. These fittings can maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. MP Husky cable tray clamps are the most reliable, highest quality, and cost effective cable tray clamps in the industry. Type GBM high. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. The screw-on cable trays are available in perforated (MKS, SKS, DKS, EKS, IKS) and unperforated (MKSU, SKSU, EKSU) versions. The systems include numerous connectors, fittings – such as bends, add-on tees, T and reducers, cross-overs and covers – and further accessories. A properly designed and installed cable tray system will provide.
