

Do I need to change my router when upgrading to 100Mbps fiber optic

Overview

Older Wi-Fi 4 or Wi-Fi 5 routers may limit your fiber internet speeds. If your current router predates the pandemic, it's likely approaching the end of its useful life. During 2020-2021, millions of families upgraded their routers to handle the sudden shift to remote. Hello I am considering upgrading to Full Fibre 150 from superfast and was enquiring what is involved?

Do I require a new router, which comes with all the complications or is it just a cable connection to existing router?

What's this?

28 Jan 2025 01:11 PM Posted by a Superuser, not a Sky employee. Below, we discuss seven common signs that you might need a new router and explain how to choose the right kit for your needs. Hi, I subscribed to 100mbps plan from my ISP, but when I test the speed from my smartphone and laptop connected via 5ghz at strong signal, its only 70-80mbps max. Currently I have Archer C54 which I assume have 10/100 WAN and LAN ports, im using. An up-to-date router is necessary for ensuring optimal network performance, security and compatibility because it supports the latest WiFi standards and can facilitate high-speed tiers.
