

Dual-circuit AC distribution box

Overview

The ACDB receives AC power from solar inverter and directs it to AC loads. We have your power distribution needs covered from DC fuse and breaker panels to datacenter quality AC power distribution units (PDUs). Let us help you select products to keep your system running. The ASI471078 Power Distribution Terminal Block Module is a compact, DIN rail-mounted solution for efficient power distribution in industrial and control applications. Designed to handle up to 250V AC/DC at 30A max, this versatile module features dual input terminals for connecting one or two power. Picture yourself in a situation where your electricity suddenly cuts out—everything comes to a standstill, the system breaks down, and expenses begin to soar. Within a durable PC enclosure, we pre-assemble reliable AC components to reduce working time and error susceptibility, thereby improving the system operations of your end-users significantly.
