

Dual-core pigtail protection box

Overview

A robust steel fiber pigtail box with dual cable entry, integrated splice tray, and organized routing channels for secure fiber termination. Available in multiple core configurations, the box supports flexible mounting options and offers reliable protection and streamlined fiber. The 2 port surface mount fiber enclosure serves as termination point designed to joint drop cable and pigtail in home or office for wall mount or surface mount installation. The FTTH fiber panel box provides superior protection as the main function of the panel is to fix the module, protect the cable at the information outlet, and play a role similar to a screen. Featuring a unified construction allowing for easy fiber identification and rapid installation, these assemblies are built to exceed all TIA and Telcordia requirements. Only need to fusion the cable, then finish. FTB86G box with 2pcs SC/APC adapters and pigtails.
