

Embedded parts for cable trays in walls

Overview

Support components like Splice Plates/Couplers join straight sections securely, while Hold Down Clamps and Support Brackets fix the tray to walls, floors, or ceiling support systems. In addition, a cable support system can be used to separate and arrange cables in groups. The systems are installed on ceilings, walls or floors. TTG eliminates the need for firestop sealants or sprays by firestopping as the wall is constructed. This design not only enhances the aesthetics of a space by hiding unsightly wiring but also ensures the safety and. This product range includes: - Installation trunking, made of PVC: Ideal for organizing and protecting cables in various environments. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Cablofil is the global gold standard for total cable management. Constructed from our dependable ladder tray components.
