

FTB200 Optical Time Domain Reflectometer

Overview

The FTB-200 delivers the processing power of a high-end platform for a variety of advanced applications—all in a conveniently sized go-anywhere field-testing tool. Integrate two metro/CWDM OTDRs to test through CWDM-based mux/demux at ITU-recommended wavelengths. Read more EXFO FTB-200 is a dual-wavelength single-mode OTDR used to take measurements in the main and city networks, access. The EXFO FTB-200 optical time domain Reflectometer (OTDR) is a high-performance OTDR produced by EXFO, Canada. It is capable of measuring the length and attenuation of optical fibers, including the fusion and switching of optical fibers, and can also be used to locate the fault point of optical. Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers.
