

Function of xzw Integrated Distribution Box

Overview

This product integrates a new outdoor integrated distribution box with multiple functions such as overcurrent, overvoltage, and phase loss protection. This product has the advantages of small size, high protection level, perfect protection performance, and high degree of. Main purpose and scope of application XZW type outdoor distribution transformer integrated distribution box is a low-voltage complete set of switchgear designed in accordance with the requirements of the national rural power grid construction, transformation and design department, based on the. The XZW integrated distribution box has a wide range of applications. It is suitable for low-voltage power grid systems operating at 50Hz AC with a rated working voltage of 380V AC. Low-voltage fixed switchgear GGD series: Mainly used in power industries such as substations and power plants, with high breaking. Distributor box AVP Terminal box AXT Give an example GCK the first g represents the distribution cabinet, the second C represents the drawer type, and the third K represents the control GGD the first g represents the distribution cabinet, the second g represents the fixed type, and the third D. What is a Distribution Box?

A distribution box, or DB box, is a circuit breaker enclosure. It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building. Applicable to factories, mining enterprises, chemical companies, large steel mills, substations, residential areas, large power plants, oil, high-rise building power centers, reactive power compensation, metering, power.
