

How to quote a price for a building s electrical distribution box

Overview

The price for a new electrical box typically combines panel cost, labor, and permitting. In practice, the total project range often falls between about \$1,500 and \$6,500 for a standard residential panel upgrade, with higher costs for larger or multi-branch systems. The distribution box cost encompasses not only the initial purchase. Whether you are a seasoned procurement officer or a first-time project manager, understanding the distribution box market is about more than just a price tag; it is about safety, scalability, and finding that sweet spot between “cheap” and “reliable. Electrical contractor pricing: hourly rates \$50-\$100, or flat-rate pricing by job type. Average markup 30-50% on materials. “ Replaced three separate apps with Elec-Mate.
