

Huawei Optical Splitter High Optical Dimensions

Overview

The Huawei OSPL43201 is a highly efficient optical splitter designed for even splitting of optical signals at a 1:4 ratio. Featuring an SC/APC termination with a compact size of 60x7x4mm, this product is an excellent choice for high-performance fiber optic network deployment. requirements in different scenarios. □ The input pigtail can be easily distinguished from the output pigtail due to the color difference. □ Made of PC+ABS/PPO material in order to meet. The SPL2605 can be independently integrated into an FDT or FAT, or encapsulated in a tray-mounted splitter SPL9201 for optical splitting in an ODF and FDT. The biggest difference between a PON network and a traditional optical network lies in the optical splitter which splits one channel of input. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3. In the earliest FTTH solution, ODN 1. Additionally, Huawei designs it for MiniFTTO.
