

Huijue Core Switch Primary Backup Configuration

Overview

Start by accessing your Huawei switch via console cable or SSH. Log in with admin privileges and enter display current-configuration to view the active settings. `cfg`—this stores the config locally on the. This section uses the following networking as an example: two stacked PEN central switches, backup for the passive aggregation module (with the master and slave ports of UPLINK-1 or UPLINK-2 connected to different PEN central switch ports), and single uplink for access switches. GitHub - jolitos/ansible-backup-huawei-switch: Repository for backup config files of Huawei switches model S5700 or S5720 with Ansible Network automation. `md`, `hosts` and `playbook` `yaml` file. `md`, `hosts` and `playbook`. But what happens when a firmware update crashes, a misconfigured command wipes settings, or a hardware failure strikes?

Without a backup configuration, restoring your network could take hours (or days) of guesswork, costing productivity and sanity. If the device. This document describes Huawei High-Quality Primary and Secondary School Campus Network Solution in terms of version mapping, solution introduction, tool usage, installation, data planning, deployment, and O&M.
