

Huijue Switch 24 Electrical Ports 8 Optical Ports

Overview

CloudEngine S5755-S series switches are next-generation Ethernet switches developed by Huawei. They provide 24/48 x GE downlink electrical ports (PoE+/PoE++) as well as 8 x 2. Moreover, MACsec is supported on all ports. Based on Huawei's unified software platform and powered by high-performance programmable chips, the switches support advanced features such as application identification. The virtualization technology allows each slave device in the stack to serve as the backup of the master, creating control and data link redundancy, as well as uninterrupted layer-3 forwarding. This improves the reliability, avoids unplanned business downtime and serves to improve overall. Aggregation switch for small and medium-sized campus networks, with 8 x 1GE/10GE SFP+ uplink ports for high-speed data transmission; 24 x 1GE SFP ports (including 8 x combo ports), providing high-speed network experience for long-distance services. To restore the factory settings and reset the switch, hold down the button for at least 6 seconds. Plug and play, quick deployment.
