

It is strictly forbidden to pile up items in the distribution box

Overview

176 (b), the material must be properly protected against falling or collapsing and must not create a hazard. It must not block the access, the emergency exit or the emergency equipment. It is strictly forbidden to work across the box and use the spreader to move sideways, telescopic and other actions to adjust the box. When the boom is extended to lift the heavy box, after lifting the heavy load, the boom needs to be retracted and then lowered to avoid overturning the center. According to OSHA 29 CFR 1910. With the right approach, you can keep both your team and your goods in mint condition. Wherever possible, stacked cargo should be stored in as uniform manner as possible for quick counting. It is advisable to set up a wall or iron shovel net not less than 2m high. Fire-resistant paint should be applied;
