

## Laos IIC Explosion-proof Distribution Box

### Overview

The Ex d TBE series of enclosures is suitable for use in Gas Group IIC for the protection of electrical and control-system solutions, such as energy distribution, monitoring of processes and the complex control of machinery and other equipment. These sturdy solutions are certified according to global standards such as ATEX, IECEx. ·Flameproof enclosure (Ex db), which can be used as feed distribution equipment in control and distribution system (such as distribution box, switch box of main circuit, control box, terminal box or motor starting box etc. ) Enclosure: 304 stainless steel, 316L stainless steel and Q235. ·Equipped. The shell is made of aluminum alloy low pressure casting, and the surface of low carbon steel is sprayed with high-voltage electrostatic spraying Plastic, stainless steel surface wire drawing, corrosion resistance, anti-aging; 2. This series of products is of flameproof structure: integrated pure. Explosion-proof Terminal Box MAMX-08 \* Cable entry \* Used in chemical, oil refining, oil exploitation, offshore oil platforms, oil tankers, military and other hazardous areas; Suitable for cable distribution when installing electrical appliances and lamps and especially when installing electrical. The BXM (D) series explosion-proof distribution box is a highly secure power distribution and control device specifically designed for explosive hazardous environments. Access Point Opening Reference Table: Can be customized according to requirements Case photo product details Application scope FAQ.
