

## Male and female wire connectors

### Overview

Hermaphroditic connections, which may include both male and female elements in a single unit, are used for some specialized tubing fittings, such as Storz fire hose connectors. In and trades and manufacturing, each half of a pair of mating or is conventionally designated as male or female, a distinction referred to as its gender. The female connector is. The describes arrow heads and mating shafts as potentially being either male or female, depending on their construction, i.e. a prong on a male arrow head fits into a hollowed out shaft and vice versa. This. In mechanical design, the prototypical male component is a threaded bolt, but an alignment post, a, or a sheet metal tab connector can also be considered as male. Correspondingly, a threaded nut, an alignme.
