Shop a large selection of fiber optic cable signs from SafetySign. com with low pricing, 10% discount on sign-up & fast shipping.

□. Fiber optic cables are network cables that hold strands of glass fibers and are intended for telecommunications and long-distance networking. They transmit information using light-based (optical) technology. It enhances safety and helps prevent accidental damage during construction, maintenance, or other work near aerial fibre routes. Bright, high-contrast design. Buried detectable & non-detectable warning tapes, high visibility reflective laminated labels & flexible line marker posts, soil markers, domed posts. Clearly identify vulnerable underground assets with durable ground-level markers. Warning systems or telescopic goal posts to highlight the dangers of working under or near to overhead electric power lines including those lines serving any part of railway systems and also to low structures such as bridges.
