

Optical module port specifications

Overview

Key specifications such as data rate, media type, reach, and diagnostic capabilities. The advantages of using modular optics over fixed ports. SFP (Small Form-factor Pluggable) optical modules are compact, hot-pluggable transceivers that enable network equipment to connect seamlessly to fiber and copper links. These modules, including SFP, SFP+, and SFP28, are widely used in enterprise networks, data centers, and carrier-grade deployments. Cisco offers a comprehensive range of pluggable optical modules for the Cisco ONS family of multiservice platforms. Cisco offers a range of GBIC, SFP, XFP, SFP+, CXP, CFP, Cisco CPAK, and QSFP+. Integrated circuits and reference designs help you create a smaller and faster optical module design used in high-bandwidth data communication applications. 8T Ethernet connectivity with 224 Gb/s per lane.
