

## Pricing of the Fiber Optic Communication Process

### Overview

This guide shows the cost landscape, with clear low-average-high ranges and per-unit pricing to help plan a project. Cost ranges for fiber optic projects vary by run length, fiber type, and whether the build is indoor or outdoor. This executive briefing on trade (EBOT) will examine the relationship between fiber optic cable input costs, specifically silica tetrachloride, helium, and energy, and the demand forces that have increased the price of fiber optic cable. Fiber optic cables transmit data in the form of light through. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000.
