

Red light pen for engineering optical power meter

Overview

This portable, red light pen tool provides accurate measurements of optical power and detects fiber faults, all within a compact design. Engineered. Check each product page for other buying options. Able to test open, short, cross-connect. Welcome and all the best, my friend! See more product details. The RPEN-210 is a necessity tool that should not be missing from any fiber plant manager or fiber optic installing technician. Tool sends visible light over a fiber strand with a 10mW power, good enough to reach. The Y3 All-in-One Optical Power Meter with Red Light Pen integrates two vital fiber optic test functions in one compact handheld device — precise optical power measurement and visible fault location using a red laser pen. This versatile tool is perfect for field engineers, FTTH installers, and. JILONG has introduced multifunctional OTDR, optical power meter, stable light source, optical fiber signal identifier, optical fiber end face detector and many more JILONG, a global provider of optical communications products, technologies and solutions, offers solutions for fiber-optic fusion.
