

Renovation of the Server Room with Cable Tray

Overview

Cable trays and racks offer structured pathways for cables. Vertical and horizontal trays, selected according to the server room layout, keep cables off the floor and easy to access. Racks with built-in cable management features minimize clutter and enhance airflow. More importantly, cable trays support modern data center design principles such as. Poor cabling practices create more than visual chaos in your server room. According to the ITIC 2024 Hourly Cost of Downtime Report, a single hour of unplanned outage could cost over CAD 300,000 for more than 90% of mid-size and large enterprises. Here are some DIY cable management tips to help keep your server room organized and. Also would recommend using velcro and NOT zip-ties because when you need to re-organize zip-tied cables it's a huuuge pain, whereas velcro is easier to change and is also re-usable. It moves beyond simple point-to-point connections and implements a hierarchical design where all cabling is routed to a central patching area.
