

Small square hole next to the cable tray

Overview

Cable hole ports/tidies or cable grommets are holes in a desk designed to organise any trailing wires. We've recently had an electrician add an extra socket and extend an aerial cable so the cables for the TV and other items are not trailing across the floor on show. It also offers future-ready ideas, troubleshooting guidance, and useful suggestions to guarantee your cable systems. It's built ON to the wall at the back with a supporting beam to rest on and be screwed into, and therefore you can't just put cables down the back, as there isn't a back space to slip down. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Proper installation of ladder cable trays is critical for ensuring an efficient and safe cable management system.
