Overview

A wall-mounted distribution box is an electrical enclosure that is fixed directly onto a wall surface. It houses circuit breakers, switches, and other control equipment, helping to distribute power safely across different areas. It is used to distribute the electricity supplied by the energy supplier to the various circuits within a building. It performs several central functions: Firstly, its NFPA LiNK is an innovative digital platform that provides instant access to 1,400 NFPA codes and standards including the NEC, along with exclusive expert commentary, visual aids, and more. It receives power from the main electrical supply and divides it into separate circuits, each.
