

What determines the price of an optical module

Overview

The 400G optical transceiver modules price is far more than a list number: it's a culmination of form-factor design, optical reach, component sourcing, testing rigor, market conditions, and operational economics. Understanding the cost of optical modules has become a formidable challenge for IT and procurement professionals. This paper is designed to help you decipher price trends, evaluate. Procurement models for hyperscale data centers are currently operating on a dangerous assumption: that the cost-per-bit for optical interconnects will naturally decay along historical curves. Optical Module Package Market was valued at 8942 million in 2024 and is projected to reach US\$ 20220 million by 2032, at a CAGR of 12. 6 billion by 2034, advancing at a compound annual growth rate (CAGR) of 11. 5% during the forecast period from 2026 to 2034.
