

# What router and network card should I use for a 100M fiber optic connection

## Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. To simplify. The following review illustrates the top ten-performing WiFi routers dedicated to 2026 fiber optic internet usage. Main search terms like best router for fiber internet, fiber optic router, best wifi router for fiber optic, best fiber optic router, and best modem for fiber internet lead your. Whether you're upgrading a workstation, scaling a small business network, or building out a hyperscale data center, a fiber network card (NIC, network interface card) is one of the most critical components for connectivity. Copper Ethernet NICs still have their place, but when bandwidth, distance.
