

## What router is needed for a 100M fiber optic connection from China Telecom

### Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). To find the best router for fiber internet, we used our expertise to select items based on key specs, such as speeds, coverage, wireless standards, security, weight, and additional features. I worked with the Cybernews research team to review and compare different routers and give. Are you in search of the perfect router for your optical fiber internet connection?

Look no further! In this guide, we'll explore the top options available on the market to ensure you experience blazing-fast speeds and seamless connectivity. The following review illustrates the top ten-performing WiFi routers dedicated to 2026 fiber optic internet usage.
