

What router should I use for a 200W fiber optic connection

Overview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. I worked with the Cybernews research team to review and compare different routers and give. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space. However, the market is flooded with countless options, making the selection quite overwhelming. Instead, you simply plug a wireless router into the ONT provided by your ISP, set it up, and start using the internet. Some popular options include: 1. TP-Link Archer AX6000: With its advanced features and high-speed.
